

AMERICAN MACINTOSH

MILLER

WISCONSIN

IMPROVED VIEW  
MACINTOSH**Standard Blades Stainless Steel****MACINTOSH**

The predominant choice of the curved blade types. The English profile is distinctive by its more gentle curvature and by a flange that gradually narrows from the base of the blade to its tip. The American profile has a slightly more abrupt curvature and a flange that starts at the base of the blade but ends before reaching the blade tip.

	AMERICAN PROFILE	ENGLISH PROFILE
Size 0, Premature - 80mm .....	<b>20147</b>	N/A
Size 1, Infant - 92mm .....	<b>20148</b>	<b>20180</b>
Size 2, Child - 108mm .....	<b>20150</b>	<b>20182</b>
Size 3, Medium Adult - 124mm .....	<b>20152</b>	<b>20184</b>
Size 3 1/2, Adult - 144mm .....	<b>20154</b>	N/A
Size 4, Large Adult - 158mm .....	<b>20156</b>	<b>20186</b>

**MILLER**

The most popular of the straight blade types. The English profile Miller has a longer flange and curves more gently at its tip than the American profile Miller blade.

	AMERICAN PROFILE	ENGLISH PROFILE
Size 0 - Premature - 75mm .....	<b>20158</b>	<b>20190</b>
Size 1 - Infant - 102mm .....	<b>20160</b>	<b>20192</b>
Size 2 - Child - 155mm .....	<b>20162</b>	<b>20194</b>
Size 3 - Medium Adult - 195mm .....	<b>20164</b>	<b>20196</b>
Size 4 - Large Adult - 205mm .....	<b>20166</b>	N/A

**WISCONSIN**

This straight blade has no curvature at its tip. The distal portion of the blade is wider and formed slightly to the right to better adapt it to lifting the epiglottis.

	AMERICAN PROFILE	ENGLISH PROFILE
Size 0 - Newborn - 75mm .....	N/A	<b>20200</b>
Size 1 - Infant - 102mm .....	N/A	<b>20202</b>
Size 2 - Child - 135mm .....	<b>20122</b>	<b>20206</b>
Size 3 - Medium Adult - 162mm .....	<b>20124</b>	<b>20208</b>
Size 4 - Large Adult - 199mm .....	<b>20126</b>	<b>20210</b>

**I.V.™ IMPROVED VIEW MACINTOSH**

The Improved View (I.V.) Macintosh blade is concave at the mid portion of the blade and thus allows superior visualization.

Size 2 - I.V. Macintosh .....	<b>20064</b>
Size 3 - I.V. Macintosh .....	<b>20066</b>
Size 3 1/2 - I.V. Macintosh .....	<b>20068</b>
Size 4 - I.V. Macintosh .....	<b>20070</b>

**ENGLISH MACINTOSH****MILLER****ROBERTSHAW****SEWARD****PENLON Fibrelight Diamond ISO "Green" Laryngoscopes**

Since designing the world's first fibrelight laryngoscope system in 1972, Penlon has established a long standing tradition of producing innovative laryngoscope products. The Diamond Laryngoscope system has now been developed to meet the latest international fibrelight laryngoscope ISO standard 7376-3 (the Green Standard), to provide a fully interchangeable, internationally compatible laryngoscope system.

- Fiber optic bundles able to withstand repeated autoclave treatments
- Five year guarantee on light guide bundles
- Lifetime guarantee on blades and handles (excluding bulb)
- Removable light guide design
- Penlon quality you can trust

Special Custom sets available upon request

**CRANWALL™**

Modified from the Miller Blade, the Cranwall™ design dramatically reduces the flange to allow tube insertion through a restricted opening.

**ROBERTSHAW**

This blade for infants and children is gently curved over the distal third and is designed to lift the epiglottis indirectly in the manner of the Macintosh blade.

**OXFORD**

Suitable for premature infants, babies and children up to the age of four, there is sufficient overhang on the open side and a broad flat lower surface to help with patients with an extreme degree of cleft palate.

**PHILLIPS**

The Phillips blade integrates the preferred straight Jackson blade design with the curved distal tip Miller design providing greater visibility and an almost direct line approach to the trachea during intubation.

**WIS-HIPPLE**

Modification of the Wisconsin blade with a straight flat spatula tip and a large circular flange.

**POLIO English Profile**

A modification of the Macintosh blade that is offset from the handle at an obtuse angle to allow intubation of patients on respirators, in body jackets, as well as other difficult situations.

**E-MAC™ Reduced Flange**

A modification of the English profile Macintosh blade. A channel has been added to provide superior visualization. The anterior flange has been reduced to enable the user to exert less force upon the maxillary incisors.
