CHEST DRAINAGE TUBES
– SILICONE

DESCRIPTION

- Open end single lumen catheter with large multiple sideholes over the distal portion of the catheter.
- The catheter can be used for the drainage of air or fluid from body cavities including the pleural space of the thoracic cage.
- The catheter is placed by blunt dissection. Metal stylets available to stiffen catheter and assist placement.
- Markings at 2.0 and 4.0 cm from the proximal sidehole assist in correct catheter placement.
- Intended for VETERINARY USE ONLY.
- Maximum sterilisation temperature 134°C for 3 minutes.

Order No. Remarks
