Benson Medical Industries Inc. is a Canadian owned and managed company, specializing in the sale and service of veterinary, hospital and dental products since 1974.

Benson Medical's head office is located in Markham, Ontario. We also serve our customers from branch offices and sub-distributors located across Canada, as well as designated sales representatives, office support staff and Clinical Product Specialists.

Benson Medical provides technical support and maintains a fully equipped service facility with factory trained personnel for both in-shop and field service repair.

Benson Medical Industries carries many items to meet your research needs. If you do not find what you are looking for, please contact us for assistance.

Why buy "Canadian"?

Benson Medical has adjusted and will continue to adjust our pricing to mirror the changes in the US/Canadian exchange rate. However, there are a number of other important factors that the purchaser should consider when comparing a product purchased from Benson Medical versus an American counterpart.

You may want to ask the following questions:

Are there any differences in the product warranty or support?

*We fully support what we sell and offer in-service training for our customers.

Can we obtain rental product in the event of an equipment problem?

*We have some rentals available to locations that purchase their equipment from us.

Does the equipment pass Canadian CSA electrical standards?

*We only sell CSA approved equipment.

What exchange rate do I get if I order directly from the US?

*All of our prices are in Canadian funds.

What are my shipping, brokerage and/or insurance costs when ordering equipment from the US?

*Like the CSA electrical approvals, these importation costs are included in our prices.

If our Canadian list prices are slightly higher than those quoted from a US-based company, we hope you consider all of these associated costs and benefits before making your decision. Benson Medical offers a personalized service that is geared specifically for the Canadian market. We value your business.

RABBIT v-gel® Sizing Guide		
Size	Ideal body weight of rabbit	Product code
R1	0.6 – 1.5kg (1.3 – 3.5lb)	D30001
R2	1 – 2kg (2 – 4.5lb)	D30002
R3	1.8 – 3.5kg (4 – 8lb)	D30003
R4	2.5 – 4kg (5 – 9lb)	D30004
R5	3.5 – 5kg (8 – 11lb)	D30005
R6	4.5kg+ (10lb+)	D30006

CAT v-gel® Sizing Guide		
Size	Ideal body weight of cat	Product code
C0	0.5 – 1kg (1 – 2lb)	D40000
C1	1 – 2kg (2.5 – 4.5lb)	D40001
C2	1.5 – 3.5kg (3 – 8lb)	D40002
C3	3 – 5kg (6.5 – 11lb)	D40003
C4	4.5 – 6kg (10 – 13lb)	D40004
C5	6kg+ (13lb+)	D40005

V-Gel® Advanced Features:

•Fast, easy, safe and stress free insertions
•Anatomical matching features combined with a soft material to give a high quality pressure seal
•No post-operative coughing or gagging
•Low airway breathing resistance due to the large airway channel within the device
•Suited to ventilated as well as spontaneously-breathing patients
•Greater seal pressure – even better for ventilating
•High quality pressure seal restricting leakage of volatile anaesthetic agents, thus improving health and safety for staff
•Tip inserts into the upper esophagus to help prevent and manage regurgitation of stomach contents
•Bowl now envelopes the whole larynx and epiglottis sits inside – avoids "blue tongue" in rabbits!
•More space and security for dental procedures
•Safer, smoother recoveries

http://docsinnovent.com/

D-grip® tube holder is a fully adaptable airway management support system for supporting the load borne by anaesthetic breathing circuits, airway devices, facemasks, monitoring cables and sampling lines. It is the perfect complement to v-gel® and offers a wide range of positioning options to optimise airway management.

Microscopes, Scopes & Video Scopes

Model 215 - Has a Seidentopf head for comfortable viewing, coaxial focusing, low drive mechanical stage and LED illumination with conveniently located intensity control. LED light rated up to 50,000 hours.

#215-RLED-ASC

The M17 compound microscope series features infinity corrected optics, ideal for college laboratories, veterinary and medical applications. Supplied with binocular head, this research level microscope also incorporates a halogen illumination system and wide field 20mm eyepieces for a very crisp image.

Infinity Corrected Binocular Microscope:

#M17B-P

Infinity Corrected Trinocular Microscope:

#M17T-P

New additions to the M10 line feature a high-resolution 3 megapixel digital camera for capturing live images of up to 2048 x 1536. Widefield 10x /20mm eyepieces. Binocular viewing head with 30° inclined eyepieces. 4x, 10x, 40xR & 100xR oil immersion objectives. 3 watt LED provides bright, white illumination for up to 50,000 hours

SutureSeal

Single Pack

SutureSeal™ is a long lasting, transparent bandage replacement made of a non-toxic biodegradable hydrogel. This is a specially formulated hydrogel designed for incision and wound protection in small and large animals. SutureSeal™ acts by forming a thin coating that protects the suture site or wound. It is Initially applied as a liquid and transforms into a flexible gel in about 90 seconds. SutureSeal™ forms a protective layer that prevents dirt and debris from entering and lasts for up to two weeks. SutureSeal™ is sterile, colorless, odorless and designed to enhance the healing process. The wound will heal and the polymer will dissolve naturally after two weeks.

ConvaTec

AQUACEL®
Hydrofiber® Wound Dressing

EXUDATE   INFECTION   BIOFILM

AQUACEL® Hydrofiber® Wound Dressing, Sterile

AQUACEL® Hydrofiber® Dressing is a white, fibrous dressing derived from 100% pure sodium carboxymethylcellulose (NaCMC). Combines the look, feel and handling properties of gauze and leading alginates, but retains more fluid than alginates and almost three times more fluid than gauze when used under compression.

-Locks in wound exudate [11] and traps bacteria [8-9],†

-Micro-contours to the wound bed[13],†

-Responds to wound conditions by forming a cohesive gel

AQUACEL® EXTRA™ Hydrofiber® Wound Dressing

Same gelling benefits of the original AQUACEL® dressing, but is 9X stronger[19] and 39% more absorbent[19]

AQUACEL® Foam Hydrofiber® Dressing, Sterile

A Soft absorbent foam pad, layered with an AQUACEL® interface that gels on contact, topped with a Waterproof/Bacteria Barrier that evaporates excess moisture.

AQUACEL® Surgical Hydrofiber® Cover Dressing

Combines Hydrofiber® Technology and hydrocolloid technologies as a single-product solution to the post-operative management of surgical incisions. Designed to enhance clinical outcomes and facilitate patient mobility.

KALTOSTAT® wound dressings, Sterile

A calcium-sodium alginate fiber dressing that can be used in moderately to heavily exuding wounds. Designed to absorb exudate and to help control minor bleeding.

Multiple sizes available. Most AQUACEL® dressings available with added silver (Ag) to provide rapid and sustained antimicrobial activity [7, 9, 16],†

7. Jones SA, Bowler PG, Walker M, Parsons D. Controlling wound bioburden with a novel silver-containing Hydrofiber® dressing. Wound Rep Reg. 2004;12:288-294.

8. Waring MJ, Parsons D. Physico-chemical characterisation of carboxymethylated spun cellulose fibres.Biomaterials. 2001;22:903-912.

9. Walker M, Hobot JA, Newman GR, Bowler PG. Scanning electron microscopic examination of bacterial immobilisation in a carboxymethylcellulose (Aquacel) and alginate dressings. Biomaterials. 2003;24(5):883-890.

13. Jones S, Bowler PG, Walker M. Antimicrobial activity of silver-containing dressings is influenced by dressing conformability with a wound surface. Wounds. 2005;17(9):263-270.

Bio-Security For A Greener World

PREVail®

Accelerated Hydrogen Peroxide (AHP) is a synergistic blend of commonly used, safe ingredients that when combined with low levels of hydrogen peroxide produce exceptional potency as a germicide and performance as a cleaner. The benefits and efficacy of AHP have been validated by third party clinical studies conducted by scientific organizations and third party researchers that are recognized by government regulatory agencies in Canada and the U.S.

ANAESTHESIA VAPORIZER SERVICE

Manufacturer's comprehensive overhaul and calibration includes:

* Complete disassembly and cleaning

* Internal and external inspection

* Replacement of internal wicks and seals

* Calibration and adjustment of Thermo-Control

* Leak test and performance verification

* Rental vaporizers provided upon request

On site vaporizer output verification is NOT a substitute for service & calibration

Vaporizers ARE NOT on site serviceable

| TEC III | TEC IV | TEC V | OHIO |

We also do Annual Preventative Anaesthetic Machine Maintenance

Veterinary service companies are highly unregulated, it is important to be aware that Benson Medical has been servicing anaesthetic equipment since 1974 and maintains the following important business and service practices;

* We maintain a Health Canada establishment license.

* We are authorized Canadian distributor for your most prominent anaesthesia equipment.

* We maintain liability insurance.

* We offer a comprehensive service report.
